## TECHNICAL

Unikey is a quality manhole lifting key kit with interchangeable tips.

**SIMPLY SWAP TIPS TO LIFT MOST MANHOLE COVERS!**

The kit includes two handles and a range of interchangeable tips, which are stored in a useful roll pouch including: 33mm T tips, 22mm T tips, 10mm Hook tips, M10 Screw tips, M12 Screw tips and Stopcock Key.

Unikey handles and tips have a 250kg Safe Working Load certified by Lloyds British Testing (1000kg straight pull destructive testing). Stopcock tip not tested.

Unikey is manufactured from quality Zinc plated carbon steel.

Accessories are available including a Carry Case and additional tips.

## UNIKEY.....Instructions for use

To insert a tip place the handle upside down on a solid surface then grip the knurled cylinder and push downwards (towards the handle).

With the knurled cylinder pulled back, insert the chosen tip and rotate gently while pushing down to engage the male end of the tip in to the recess in the handle, then release the cylinder.

To remove a tip pull back the knurled cylinder towards the handle and pull the tip away from handle at the same time.

## MISSION STATEMENT

'Innovation for Construction' is the heartbeat of **METEX**

We design and supply the Construction Industry with ingenious, high quality and effective products saving both time and money on site.
