SCB4-66 0.94kW 1PH PERFORMANCE CURVES

Model reference	Freq.	Motor	Voltage	Current (A)	Weight	Noise level	Freeflow	Max. Vacuum	Max. Pressure
SCB4-66-0.94kW-1PH	50Hz	0.94kW	220-240V	6.8	19kg	57dB(A)	66m³/hr	-250mbar(g)	350mbar(g)
	60Hz	1.1kW	220-240V	6.8		62dB(A)	80m³/hr	-280mbar(g)	390mbar(g)

Performance curves are provided as a guide, based on air at an ambient temperature of 15°C at an atmospheric pressure of 1013 mbar with a tolerance of ± 10%. The maximum pressure differentials are valid for suction and ambient temperature up to 25°C. This machine can be used for either vacuum or pressure duty in continuous operation. For other conditions please discuss with us. Motors are IP55 with insulation class F and versions are UL/CSA approved.
